Review Report on Consolidated Interim Financial Statements

To the Members of board of directors of Lecico Egypt Company

Introduction

We have performed a limited review for the accompanying consolidated statement of financial position of Lecico Egypt (S.A.E.) and its subsidiaries as of September 30, 2020 and the related consolidated statements of income and comprehensive income, changes in equity and cash flows for the nine – months then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these interim consolidated financial statements in accordance with International Financial Reporting Standards. Our responsibility is to express a conclusion on these interim consolidated financial statements based on our limited review.

Scope of Limited Review

We conducted our limited review in accordance with International Standard on Review Engagements 2410, "Limited Review of Interim Financial Statements Performed by the Independent Auditor of the Entity." A limited review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters in the Company, and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these interim consolidated financial statements.

Basis of Qualified conclusion

- 1- As described in note no. (3) of the notes to interim consolidated financial statement regarding the situation in Lebanon, the management included Lecico Lebanon unaudited figures. Lecico Lebanon management was required to submit unaudited financials, due to the Lebanese situation, their auditors are unable till now to complete their audits in Lebanon due the questions raised about asset values and business sustainability across the entire Market. We were not provided with sufficient and appropriate evidence regarding this financial information.
- 2- The auditor's report of one of the subsidiaries (Lecico UK) included a qualification regarding the balance of the goodwill included in the intangible assets with an amount of EGP 2,3 million as of September 30, 2020 due to the absence of the audit evidence regarding information on this balance relates to or how it was initially recognized and recorded (note no. (14)).

Conclusion

Except for the effects of such adjustments, if any, as might have been determined has we obtained the data referred to in the above mentioned paragraph of the base of qualified conclusion. And in light of our limited review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Company as at September 30, 2020, and of its consolidated financial performance and its cash flows for the six-months then ended in accordance with international financial reporting standards.

Emphasis of Matters

Without qualifying our conclusion, we would like to draw attention to the following:

- 1- As detailed in note no. (3) of the notes to the interim consolidated financial statements, Lebanon from the starting of the year 2019 and still facing instability politically which generally affected the Lebanese economy and led to the reduction in the economic activities. Accordingly, this might have a significant effect on the value of the assets and liabilities and the results of operations of Lecico's Lebanese subsidiary. It is this uncertainty that has prevented the subsidiary's auditor from completing their audits and reviews. Consequently, we cannot determine the effect of the Lebanese situation on the consolidated financial statements.
- 2- As detailed in note no. (22) of the notes to interim consolidated financial statements, The management intends to reinvest, indefinitely, the retained earnings of the foreign subsidiaries. These retained earnings might be subject to tax at different rates upon distribution, depending on subsidiaries' country of incorporation.
- 3- As detailed in Note No. (37) of the notes to the financial statements, during the first quarter of 2020, most countries of the world, including Egypt, were exposed to the outbreak of the new Corona pandemic (COVID-19), which caused disturbances in most commercial and economic activities in general and the industrial activity exercised in Egypt in particular. Therefore, it is probable that this matter will have a significant impact on pre-defined operational and marketing plans and their associated future cash flows and the associated elements of assets and liabilities and business results in the company's financial statements during the following period / periods.

As indicated in the above note, the Company's management is currently taking several measures to encounter this risk and limit its impact on its financial position and support its ability to continue exercising its activity on going concern.

However in the light of the instability and uncertainty as a result of the current events, the extent of the impact of those events depend mainly on the time span of the continuity of those effects that are expected to end that event and the consequences thereof, in addition to the Company's ability to achieve its plans in order to encounter ~~also note, the matter which is difficult to determine at the present time.~~

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

1- Reporting Entity

The consolidated financial statements of the company for the financial period ended September 30, 2020 comprise the parent company and its subsidiaries (together referred to as the “Group” and individually as “Group entities”)

1-1 Lecico Egypt (the Parent)

Lecico Egypt (S.A.E.) was established on November 1st, 1975 according to the resolution of Ministry of Economics and Economic Co-operation number 142 of 1975. The company is subject to the investment law no. 72 of 2017 that superseded law no. 8 of 1997. The parent company’s purpose is the production of all ceramic products including the production of sanitary ware and all kinds of tiles and entering into capital lease transactions.

1-2 Subsidiaries

The following is a list of the subsidiaries comprising the consolidated financial statements together with the respective percentage owned by the Parent: -

	Country of Incorporation	Ownership Interest	
		30/9/2020	31/12/2019
		%	%
Lecico for Ceramics Industries (S.A.E.)	Egypt	99.99	99.99
TGF for Consulting and Trading (S.A.E.)	Egypt	99.83	99.83

European Ceramics (S.A.E)	Egypt	99.97	99.97
Sarrguemines (S.A.E) (previously named “Lecico Plus for Trading”)	Egypt	99.85	99.85
Burg Armaturen Fabrik Sarrdesign (S.A.E.)	Egypt	69.85	69.85

2- Basis of Preparation of consolidated interim financial statements

2-1 Statement of Compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and its interpretations adopted by the International Accounting Standards Board (IASB).

2-2 Functional and presentation currency

The functional currency of the company is Egyptian Pounds; each entity in the group determines its own functional currency and items included in the financial statements of each entity is measured using that functional currency.

The consolidated financial statements are presented in Egyptian Pounds (LE) which is the company's functional currency.

2-3 Use of Estimates and Judgments

The preparation of consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised and in any future periods affected.

2-4 Basis of Measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following:

- Derivative financial instruments are measured at fair value.
- Financial instruments at fair value through profit or loss are measured at fair value.
- Available-for-sale financial assets are measured at fair value.

3- The financial statements of Lecico Lebanon (A subsidiary) for the financial period ended September 30, 2020

Lecico Egypt (S.A.E.)**Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020**

Lebanon is facing instability politically which generally affected the Lebanese economy and led to the reduction in the economic activities. Lecico Lebanon's management was required to submit unaudited financials due to Lecico Egypt's reporting timeline as a public company because Lecico Lebanon's auditors are unable till now to complete any audits in Lebanon due the questions raised about asset values and business sustainability across the entire Market. Accordingly, this might have a significant effect on the assets and liabilities and the results of operations of the Lebanese subsidiary in the future. Currently it is not possible for auditors in Lebanon to determine the effect of the Lebanese situation on any business in the Country and their future financial statements. Accordingly, the figures included in the consolidated financial statements are based on unaudited financial statements from the management.

Considering the circumstances referred to and its consequences that may affect the business in Lebanon generally; the Lebanese subsidiary's auditor did not quantify the effect of such circumstances upon its assets and liabilities included in its separate financial statements as at September 30, 2020. On preparing the accompanying consolidated financial statements as at September 30, 2020; the group management depends on a separate unaudited financial information and data for the Lebanese subsidiary to be entered the consolidated financial statements as at September 30, 2020:

<u>Description</u>	September 30, 2020 <u>LE</u>
<u>Assets</u>

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

The company's management decided to adopt the revaluation model as per International Accounting Standard No. 16 "Property, Plant & Equipment" in respect to the land owned by the company and its subsidiaries, which states that:

"After recognition as an asset, an item of property, plant and equipment whose fair value can be measured reliably shall be carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations shall be made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

The frequency of revaluations depends upon the changes in fair values of the items of property, plant and equipment being revalued. When the fair value of a revalued asset differs materially from its carrying amount, a further revaluation is required. Some items of property, plant and equipment experience significant and volatile changes in fair value, thus necessitating annual revaluation. Such frequent revaluations are unnecessary for items of property, plant and equipment with only insignificant changes in fair value. Instead, it may be necessary to revalue the item only every three or five years.

If an asset's carrying amount is increased as a result of a revaluation, the increase shall be recognised in other comprehensive income and accumulated in equity under the heading of revaluation surplus. However, the increase shall be recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss

The revaluation surplus included in equity in respect of an item of property, plant and equipment may be transferred directly to retained earnings when the asset is derecognised. This may involve transferring the whole of the surplus when the asset is retired or disposed of. However, some of the surplus may be transferred as the asset is used by an entity. In such a case, the amount of the surplus transferred would be the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost. Transfers from revaluation surplus to retained earnings are not made through profit or loss."

The result of such change resulted in an excess amount of EGP 1 687 792 447 which is recognised into the Other Comprehensive Income Statement and in the equity under "Reserves" Note.

During February 2020 the lands of Lebanese for Ceramics (Lecico -Lebanon) have been revaluated because the decrease of their fair value and this result in decrease in land values by an amount of L.E 125 287 297 which recognized in comprehensive income statement and consolidated equity reserves and non controlling interest.

During June 2020 the lands of the group of companies have been revaluated because the decrease of their fair value and this result in decrease in land values by an amount of L.E 478 079 117 which recognized in comprehensive income statement and consolidated equity reserves and non controlling interest.

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

The Electricity Utility Organization in Lebanon has charged The Lebanese Ceramic Industries S.A.L. (a subsidiary) about LBP 855 million (equivalent to LE 9 million) as unpaid electricity charges for the period from March 1996 until August 2003. This Subsidiary has objected to these charges, and raised a legal case requesting the cancellation of such charges. This matter is still pending in the court and its outcome is not known as at the date of issuing the consolidated financial statements. No provisions have been taken by the subsidiary against this claim.

33- Capital Commitment

There were no are capital commitments' as at September 30, 2020 (There were no capital commitments as at December 31, 2019).

34- Financial Instruments

The financial instruments are represented in cash balances, bank overdrafts, debtors and creditors. The book value of these instruments represents a reasonable estimate of their fair value.

The following are the summaries of the major methods and assumptions used in estimating their fair values of financial instruments:

- Fair value is based on quoted market prices at the balance sheet date without any deduction for transaction costs.
- Trade and other receivables and payables with a remaining life of less than one year, the notional amount is deemed to reflect the fair value.

35- Financial Instruments Risk Management

35-1 Interest Risk

The interest risk is represented in changes in interest rates which adversely affect the results of operations and cash flows. In financing its working capital the Parent depends on bank overdrafts at variable interest rates. In financing its expansion projects the Parent Company depends on equity and long-term loans at the best offered rates and conditions available.

35-2 Credit Risk

Represented in the ability of the clients who have been granted credit to pay their debts and the probability that the Parent Company may lose all or part of these debts. This is considered one of the risks that confront the Company. To address this risk the Parent Company established selling policies so that credit would only be granted to well-known clients and where appropriate, obtaining adequate guarantees.

35-3 Foreign Currency Exchange Rates Fluctuations Risk

Foreign currency exchange rate fluctuation risk is represented in exchange rate changes that affect payments in foreign currencies in addition to the revaluation of monetary assets and liabilities denominated in foreign currencies. Due to the volatility of foreign currency exchange rates, the foreign currency exchange rate fluctuations risk is considered high.

Lecico Egypt (S.A.E.)**Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020**

36- Tax Status

<u>Type of tax</u>	<u>Years</u>	<u>Status</u>
Corporate tax	From inception Till 2007	Tax dispute was finalized, and all tax obligation was paid.
	2008/2012	The parent company's records were examined and informed by the related tax forms which was objected within the legal dates.
	2013/2019	The parent company's records were not examined yet.
Salary tax	Till 2008	The parent company has obtained a final settlement and paid all the tax obligations for these years.
	2009 till now	The parent company's records were not examined yet.
Stamp duty	From inception Till 2012	Tax dispute was finalized and all tax obligation arisen was paid.
	From 1/1/2013 till now	The parent company's records were not examined yet.
Sales tax	Till 2014	The tax examination occurred and were paid all the tax obligations arisen.
	From 2015 till now	The parent company's records were not examined yet.

37- Significant Events

Most countries of the world, including Egypt, were exposed during the first quarter of 2020 to a state of economic slowdown and downswing as a result of the outbreak of the novel Coronavirus disease (COVID-19). The governments of the world, including the Egyptian government, made packages of precautionary measures to prevent the outbreak of the pandemic, and these measures led to a state of economic slowdown on the global and local levels, the matter which showed its impact on all activities in various forms of practicing and on the industrial activities particularly in Egypt.

With respect to the company's activity, the impact is represented in the decrease of the company's operational distribution capabilities and the operating capacity of individuals. The company's preliminary data shows rapid decrease in export sales during April and May, probably less than 50% of export sales levels recorded in the fourth quarter 2019. The local sales were not affected due to the Egyptian government decision with partial lockdown, and not implementing the complete prohibition of citizens. The sales level in the second quarter 2020 is expected to reach low records and it will be a temporary decrease.

The ordinary general assembly for the company was postponed due to the outbreak of the novel Coronavirus disease (COVID-19) and the Egyptian government decision with partial lockdown to approve the financial statements of the financial year ended December 31, 2019.

38- Significant accounting policies

The Company has consistently applied the following accounting policies to all periods presented in these financial statements.

38-1 Basis of consolidation

a. Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

b. Non-controlling interests (NCI)

NCI are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition.

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

c. Lose of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. former subsidiary is measured at fair value when control is lost.

d. Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

38-2 Foreign currency

Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of the Company at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction. Foreign currency differences are generally recognised in profit or loss.

a. Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into euro at the exchange rates at the reporting date. The income and expenses of foreign operations are translated into euro at the exchange rates at the dates of the transactions.

Foreign currency differences are recognised in other comprehensive income "OCI" and accumulated in the translation reserve, except to the extent that the translation difference is allocated to non-controlling interest "NCI".

When a foreign operation is disposed of in its entirety or partially such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. If the Group disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is reattributed to NCI. When the Group disposes of only part of an associate or joint venture while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

38-3 Revenues

Sale of goods

Revenue is recognised when the significant risks and rewards of ownership have been transferred to the customer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably. Revenue is measured net of returns, trade discounts and volume rebates.

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

38-4 Employee benefits

38-4-1 Employees' pension

The holding company and two subsidiary companies (Lecico Ceramic Industries and European Ceramics) contribute 3% of the annual remuneration of employees in addition to 0.5% to 1% of the net profit for the year which is recognized during the year until approval by the General Assembly of Shareholders for annual distributions.

38-4-2 Profitability of the employee's share of profit is recognized in the respective year.

38-5 Finance income and finance costs

The Company's finance income and finance costs include:

- Interest income;
 - Interest expense;
 - The net gain or loss on financial assets at fair value through profit or loss;
 - The foreign currency gain or loss on financial assets and financial liabilities;
- Interest income or expense is recognised using the effective interest method.

38-6 Income tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI.

a. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

b. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- Temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- Taxable temporary differences arising on the initial recognition of goodwill.

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans for individual subsidiaries in the Company.

Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the Company has not rebutted this presumption.

Deferred tax assets and liabilities are offset only if certain criteria are met.

38-7 Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the moving average method. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

38-8 Property, plant & equipment

38-8-1 Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

38-8-2 Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

38-8-3 Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative year.

<u>Assets</u>	<u>Years</u>
Buildings	20-40 years
Lease hold improvements	3 years
Machinery and equipment	3-16.67 years
Vehicles	3-10 years
Tools and Supplies	5 years
Furniture, office equipment & computers	4-12.5 years

- Leasehold improvements are depreciated over the period of the contract or useful life of the lease which ever is less.

- Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

38-9 Projects In Progress

This item represents the amounts spent for constructing or acquiring of fixed assets. Whenever it is completed and ready for its intended use in operations, then, it is transferred to fixed assets. Projects in progress are recorded at cost, and not depreciated until transferred to fixed assets.

38-10 Intangible assets

38-10-1 Goodwill

All business combinations are accounted for by applying the purchase method. Goodwill represents amounts arising on acquisition of subsidiaries. Goodwill is stated at cost less any accumulated impairment losses. Goodwill is allocated to cash-generating units and is tested annually for impairment

In respect of acquisitions that have occurred, goodwill represents the difference between the cost of the acquisition and the fair value of the net identifiable assets acquired. Positive goodwill is stated at cost or deemed cost less accumulated impairment losses.

38-10-2 Intangible Assets

Intangible assets which include the Trademark of Lecico UK and development costs are valued at cost, and amortized over ten years. Lecico Lebanon (a

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

subsidiary) recognizes a payment to enter a lease agreement as an intangible assets this asset has an indefinite legal life, accordingly it is not amortized but is subjected to an annual impairment test.

38-10-3 Amortization

Amortization is charged to cost of intangible assets less their estimated residual value using straight line method over estimated useful lives of those assets and the amortization charge is recognized as an expense in profit and loss. Good will is not amortized.

38-11 Leased Assets

Capital leased assets which confer rights and obligations similar to those attached to owned assets are included in the fixed assets at an amount equal to the lower of its fair value and the present value of the minimum lease payments at inception of the lease and depreciated over their estimated useful life at rates applied to the identical assets. The liability is recorded in the long-term liabilities as a capital lease obligation (except for the current portion which is presented in current liabilities) in an amount equal to the utilised portion of the obligation after deducting the principal's portion of the paid instalments. The interest expense portion is recognized in the income statement.

38-11-1 Finance Lease Payments

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each year during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

38-11-2 Initial measurement of the usufruct asset:

The cost of an usufruct asset is the right of use of:

- A- The initial measurement amount of the lease obligation, at the present value of the unpaid lease payments at that date. Lease payments are discounted using the interest rate implicit in the lease, if that rate can be easily determined. If this rate cannot be determined, the lessee must use the interest rate on the additional tenant's borrowing.
- B- Any lease payments made on or before the lease commencement date less any lease incentives received;
- C- Any initial direct costs incurred by the lessee.
- D- An estimate of the costs to be incurred by the lessee in dismantling and removing the asset subject to the contract, returning the location where the asset is to the original state or returning the same asset to the required condition in accordance with the terms and conditions of the lease, unless those costs are incurred to produce the inventory. On the date of commencement of the lease or because of the use of the underlying asset within a certain period.

Subsequent measurement of the lease obligation:
After the start date of the lease, the following are:

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

- 1- Minus any accumulated depreciation and any accumulated impairment losses;
- 2- Amended by any re-measurement of the lease obligation.

- Initial measurement of lease obligation:

At the inception of the lease, the lease liability is measured at the present value of the unpaid lease payments at that date. Lease payments are discounted using the interest rate implicit in the lease if that rate can be easily determined. If this rate cannot be easily determined, the lessee must use the company's additional borrowing rate as a lessee.

- Subsequent measurement of the lease obligation:

After the start date of the lease, the following are:

- 1- Increase the book amount of the obligation to reflect the interest on the lease obligation;
- 2- Reducing the book amount of the obligation to reflect rental payments.
- 3- Re-measure the book amount of the obligation to reflect any reassessment or adjustment of the lease contract or to reflect the fixed lease payments in its adjusted core.

The principal of the right of use and the obligations of leases are displayed in the financial position list separately from other assets and liabilities.

Leases contracts include the tenant's maintenance and insurance of the leased asset and the lease does not involve any arrangements for the transfer of ownership at the end of the lease period.

For a contract with a rental component with one or more rental components, (if any), the compensation in the contract is allocated to each rental component on the basis of the independent proportional price of the rental component and the total independent price of non-rental components. As a practical means, and within the scope of what the standard allows, the company as a tenant may choose by the category of the asset in place of the contract not to separate non-rental components from the rental components, and thus account for each rental component and any associated non-rental components as a single rental component.

Operating leases:

Recognition and measurement

Lease payments from operating leases are recognized as an expense either in a fixed-rate manner or on another regular basis. The lessor must apply another regular basis if that basis is more an expression of the pattern in which the benefit of using the contract-in-the-contract asset is diminishing.

38-12 Financial instruments

The Company classifies non-derivative financial assets into the following categories: financial assets at fair value through profit or loss, held-to-maturity financial assets, loans and receivables and available-for-sale financial assets.

The Company classifies non-derivative financial liabilities into the following categories: financial liabilities at fair value through profit or loss and other financial liabilities category.

38-12-1 Non-derivative financial assets and financial liabilities – Recognition and derecognition

The Company initially recognises loans and receivables and debt securities issued on the date when they are originated. All other financial assets and financial liabilities are initially recognised on the trade date when the entity becomes a party to the contractual provisions of the instrument.

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred, or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control over the transferred asset. Any interest in such derecognised financial assets that is created or retained by the Company is recognised as a separate asset or liability.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to offset the amounts and intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

38-12-2 Non-derivative financial assets – Measurement

Financial assets at fair value through profit or loss

A financial asset is classified as at fair value through profit or loss if it is classified as held-for-trading or is designated as such on initial recognition. Directly attributable transaction costs are recognised in profit or loss as incurred. Financial assets at fair value through profit or loss are measured at fair value and changes therein, including any interest or dividend income, are recognised in profit or loss.

38-12-3 Held-to-maturity financial assets

These assets are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest method.

38-12-4 Loans and receivables

These assets are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest method.

38-12-5 Available-for-sale financial assets

These assets are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

value and changes therein, other than impairment losses and foreign currency differences on debt instruments, are recognised in OCI and accumulated in the fair value reserve. When these assets are derecognised, the gain or loss accumulated in equity is reclassified to profit or loss.

38-12-6 Non-derivative financial liabilities – Measurement

A financial liability is classified as at fair value through profit or loss if it is classified as held-for-trading or is designated as such on initial recognition. Directly attributable transaction costs are recognised in profit or loss as incurred. Financial liabilities at fair value through profit or loss are measured at fair value and changes therein, including any interest expense, are recognised in profit or loss.

Other non-derivative financial liabilities are initially measured at fair value less any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortised cost using the effective interest method.

38-13 Share capital

38-13-1 Ordinary shares

Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity. Income tax relating to transaction costs of an equity transaction are accounted for in accordance with IAS 12.

38-13-2 Repurchase of share capital

When share capital recognized as equity is repurchased, the amount of consideration paid, including directly attributable costs, is recognized as a change in equity. Repurchased shares are classified as treasury shares and presented as deduction from total equity.

38-14 Impairment

38-14-1 Non-derivative financial assets

Financial assets not classified as at fair value through profit or loss, including an interest in an equity-accounted investee, are assessed at each reporting date to determine whether there is objective evidence of impairment.

Objective evidence that financial assets are impaired includes:

- Default or delinquency by a debtor;
- Restructuring of an amount due to the Company on terms that the Company would not consider otherwise;
- Indications that a debtor or issuer will enter bankruptcy;
- Adverse changes in the payment status of borrowers or issuers;
- the disappearance of an active market for a security because of financial difficulties; or

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

- observable data indicating that there is a measurable decrease in the expected cash flows from a group of financial assets.

For an investment in an equity security, objective evidence of impairment includes a significant or prolonged decline in its fair value below its cost.

38-14-2 Financial assets measured at amortized cost

The Company considers evidence of impairment for these assets at both an individual asset and a collective level. All individually significant assets are individually assessed for impairment. Those found not to be impaired are then collectively assessed for any impairment that has been incurred but not yet individually identified. Assets that are not individually significant are collectively assessed for impairment. Collective assessment is carried out by grouping together assets with similar risk characteristics.

In assessing collective impairment, the Company uses historical information on the timing of recoveries and the amount of loss incurred, and makes an adjustment if current economic and credit conditions are such that the actual losses are likely to be greater or lesser than suggested by historical trends.

An impairment loss is calculated as the difference between an asset's carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through profit or loss.

Available-for-sale financial assets

Impairment losses on available-for-sale financial assets are recognised by reclassifying the losses accumulated in the fair value reserve to profit or loss. The amount reclassified is the difference between the acquisition cost (net of any principal repayment and amortisation) and the current fair value, less any impairment loss previously recognised in profit or loss. If the fair value of an impaired available-for-sale debt security subsequently increases and the increase can be related objectively to an event occurring after the impairment loss was recognised, then the impairment loss is reversed through profit or loss. Impairment losses recognised in profit or loss for an investment in an equity instrument classified as available-for-sale are not reversed through profit or loss.

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

a. Equity-accounted investees

An impairment loss in respect of an equity-accounted investee is measured by comparing the recoverable amount of the investment with its carrying amount. An impairment loss is recognised in profit or loss, and is reversed if there has been a favourable change in the estimates used to determine the recoverable amount.

38-14-3 Non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than biological assets, investment property, inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

38-15 Provisions

Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

38-15-1 End of Services Benefit Fund (Defined contribution plan)

The parent company and two of its subsidiaries (Lecico for Ceramic Industries and European Ceramics) contributed to an employees End of Services Benefit

Lecico Egypt (S.A.E.)

Consolidated Interim Financial Statements Notes for the financial period ended September 30, 2020

fund. This contribution represents 3 % of the annual salaries. In addition, 0.5% to 1% of the annual net profit is recognized in the current year but pending the approval by the General Assembly Meeting along with annual dividends.

38-15-2 The group policy on Employees' Profit Participation is to accrue these employees benefits in the year to which it relates.

38-16 Cash and Cash Equivalents

Cash and cash equivalent comprises cash balances and call deposits. For the purpose of preparing the cash flow statement, cash and cash equivalents are defined as balances of cash on hand, bank current accounts, notes receivable and time deposits with maturity of less than three months. The Bank overdrafts which are repayable on demand form an integral part of the company's cash management. Accordingly, bank overdrafts are included as a component of cash and cash equivalents for the purpose of preparing the cash flow statement.

38-17 Borrowing Cost

The borrowing cost, represented in interest expenses, is recognized in the income statement under the "Financing Expenses" account in the year in which it occurs.

Those borrowing costs to be considered as parts of a qualified fixed asset that take a substantial year to be prepared for its intended use are capitalized. This accounting treatment is applied consistently to all borrowing costs and all qualified fixed assets.

38-18 Segment Reporting

A segment is a distinguishable component of the Group that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

38-19 Consolidated Cash Flows Statement

The cash flows statement is prepared according to the indirect method.
